PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate (B.Tech 2nd Year) at KIIT with a dedicated focus on Artificial Intelligence and Machine Learning. Building a solid foundation in programming, data structures, and web development, complemented by practical hackathon and project exposure including backend cryptography and digital communication verification in Smart India Hackathon 2026 Internal Round. Committed to continuous technical growth demonstrated through certified learning in programming, cloud foundations, and cybersecurity.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering 2025 – 2029 **2nd Year**

Kalinga Institute of Industrial Technology (KIIT) • Artificial Intelligence & Machine Learning (AI & ML)

Class 12 (Senior Secondary)
Academic Global School, Gorakhpur, Uttar Pradesh Board: CBSE

Class 10 (Secondary)
Creane Memorial High School, Gaya, Bihar Board: CBSE

CURRENT 2ND-YEAR COURSEWORK

Probability and Statistics (PS), Data Structures (DS), Digital System Design (DSD), Automata and Formal Languages (AFL), Scientific and Technical Writing (STW), Industrial 4.0 (IND)

TECHNICAL SKILLS

Programming:	C, Python
Web Development:	HTML, CSS, JavaScript
Core Foundations & Learning:	Data Structures & Algorithms, JavaScript, Artificial Intelligence / Machine Learning, Web Development
Developer Tools:	Git, GitHub

PROJECTS

FindIt — Smart Lost & Found Platform Completed

Full Stack & Applied AI

An AI-powered Lost & Found platform that simplifies reporting, discovering, and recovering lost belongings through intelligent matching, secure ownership verification, and seamless communication.

Full Stack & Applied AI Developer

Engineered full-stack Smart Lost & Found platform with FastAPI backend, React/TypeScript frontend, AI-powered semantic matching, secure ownership claims, and Cloudinary media management.

Technologies: React.js, TypeScript, Python, FastAPI, PostgreSQL, SQLAlchemy, SQLite, JWT Authentication, Cloudinary, Google Sign-In, AI-powered semantic matching, Vercel, Render

Planet Hunters — Find New Worlds in Starlight | HACK4HACK 2026 2026

Machine Learning / Artificial Intelligence

An astronomy-focused Machine Learning project developed for the HACK4HACK ML Challenge 2026, combining detector-aware data processing, 88 domain-engineered features, and a heterogeneous three-model ensemble to classify stellar observations and investigate potential planetary signals.

Machine Learning Engineer & Web Application Developer

Developed an astronomy-focused Machine Learning solution using detector-aware cotrending, 88 domain-engineered features, and a heterogeneous LightGBM, HistGradientBoosting, and CatBoost ensemble. Completed Round 1 and was shortlisted for Round 2 of the HACK4HACK ML Challenge 2026.

Engineered 88 domain-informed features with Camera/CCD cotrending; deployed a 5-fold tri-architecture ensemble (LightGBM, HistGradientBoosting, CatBoost) achieving 0.6455 OOF Macro F1 and 0.6336 detector-channel generalization across 8 classes.

Engineered dual telemetry interfaces (Next.js 16 web application and Python Streamlit mission control) with automated 14-point schema & physics validator ensuring bitwise reproducibility.

Technologies: Python, LightGBM, HistGradientBoosting, CatBoost, Machine Learning, Feature Engineering, Ensemble Learning, Scientific Data Analysis, Data Analysis, Model Evaluation

Dark Store Private-Label Defence Strategy — Unstop Prompt to Podium Completed / Participated

Business Strategy Research | Competition Project

A competition-based business strategy research project examining how a national dairy brand can defend its market position against private-label competition in Delhi NCR's quick-commerce ecosystem.

Lead Researcher & Business Strategist

Conducted competition-based business strategy research for Unstop Prompt to Podium, examining quick-commerce dark store dynamics, platform private-label competition, and channel margin disparities (4.5% quick commerce vs ~25% traditional retail & D2C) in Delhi NCR.

Constructed a verified 24-month multi-scenario customer cohort model evaluating unit economics (Base-case ROI: -50.6%, Year-1 LTV/CAC: 1.12x on ₹1,148L cumulative investment).

Formulated an actionable 5-point strategic defence framework (freshness moats, batch QR traceability, SKU architecture, and Kirana profit engine protection) supported by a 12-month phased roadmap and enterprise risk register.

Research and presentation developed with the assistance of Kreyato AI.

Technologies: Business Research, Strategic Analysis, Market Research, Competitive Analysis, Financial Modelling, Data Interpretation, Presentation and Communication

CLICKBAIT Completed

Smart India Hackathon 2026

A student-focused digital verification platform designed to help users identify potentially suspicious communications, including emails, scholarship notices, examination circulars, fee updates, internship messages, URLs, and raw messages — before trusting them.

Backend / Cryptography / Security

Contributed to backend verification logic (Ed25519 signing/verification, SHA-256 hashing, public-key verification, expiry/revocation checking, and tamper detection) for digital communications.

Technologies: Ed25519, SHA-256, Node.js, Python, Cryptography, Backend Security

Personal Portfolio Website Completed

Web Development

A responsive personal portfolio website built to showcase my academic journey, technical skills, projects, achievements, and verified certifications. It brings my professional profile, project demonstrations, and contact information together in one accessible platform.

Full Stack Development | UI/UX Design | Performance & Integration

Engineered a responsive personal portfolio featuring dynamic Vanilla JavaScript data rendering, custom dark-theme styling, accessible modal viewers, and automated ATS PDF generation with Puppeteer.

Integrated comprehensive showcase hubs for 7 projects, 14 verified certifications, hackathons, and research case studies with continuous CI/CD deployment on Vercel and GitHub Pages.

Technologies: HTML5, CSS3, JavaScript (ES6+), Vercel, Puppeteer

ACHIEVEMENTS & ACTIVITIES

Smart India Hackathon 2026 — Internal Round 2026

Project: CLICKBAIT • Internal Round Completed

Participated in the Smart India Hackathon 2026 Internal Round as part of the team behind CLICKBAIT, a student-focused digital verification platform for analyzing and verifying potentially suspicious digital communications.

HACK4HACK 2026 — ML Challenge 2026

Project: Planet Hunters — Find New Worlds in Starlight • Shortlisted for Round 2

Shortlisted for Round 2 after participating in Round 1 with Planet Hunters, an astronomy-focused Machine Learning project.

Unstop — Prompt to Podium: Research. Create. Present. 2026

Topic: Dark Store Private-Label Defence Strategy for a National Dairy Brand in Delhi NCR's Quick-Commerce Ecosystem • Completed / Participated

Completed a competition-based research and business strategy project focused on defending a national dairy brand against private-label competition in Delhi NCR's quick-commerce ecosystem (Status: Completed / Participated).

CERTIFICATIONS (14 VERIFIED CREDENTIALS)

Introduction to Critical Infrastructure Protection — OPSWAT Academy (Introduction to CIP Program) September 18, 2026

CipherQuest — Coding Ninjas — KIIT Chapter (Certificate of Participation) Verified

CS105: Introduction to Python — Saylor University (Certificate of Achievement) September 21, 2026

Social Media Content and Strategy — Adobe Training Program / Ladli Foundation Trust (Certificate of Completion) September 22, 2026

AWS Certified Data Engineer - Associate Exam Prep Plan — Completion Certificate — AWS Training & Certification (Completion Certificate) September 23, 2026

Adobe Express Crash Course (Certificate of Completion) 28 September 2026

Basics of Data Structures and Algorithms — Simplilearn SkillUp (Certificate of Completion) 7 October 2026

Roadmap to Become a Data Scientist at Amazon — Coding Ninjas (Certificate of Participation) Verified

C Programming Basics — Simplilearn SkillUp (Certificate of Completion) September 18, 2026

Making Accessible Designs — Adobe Training Program / Ladli Foundation Trust (Certificate of Completion) September 22, 2026

AWS Certified Developer - Associate Exam Prep Plan — Completion Certificate — AWS Training & Certification (Completion Certificate) September 23, 2026

TCS iON Career Edge - Young Professional — Tata Consultancy Services (TCS iON) (Certificate of Achievement) September 16, 2026

AWS Certified AI Practitioner — Exam Prep Plan — AWS Training & Certification (Completion Certificate) September 28, 2026

SkillQuest - Generative AI Literacy — Simplilearn SkillUp (Certificate of Accomplishment) 20 October 2026
